

## Overview

In 1974, GAI set itself apart from other engineering and environmental consulting firms in the Mid-Atlantic by establishing an in-house team of Cultural Resource Management (CRM) specialists. Today, with a staff of over 40 cultural resources specialists, GAI has gained a long-standing reputation with its clients for its efficient and cost-effective approach to guiding our clients through the Section 106, NEPA, FERC clearance process and through various local, SHPO, and Native American coordination issues.

## Services

The Cultural Resources Group offers several in-house specialty services to our clients which support different industry regulations including Section 106, NEPA, Section 4F, FERC, Community Development grants and various state and local regulations. These services include:
